PERSONAL EXPERIENCE

Programming Commissioner

October 2022 - Present

- Specialized in serving students clients, understanding their unique requirements and provide a budget-friendly solution without compromising on the quality and functionality of the programs and applications.
- Developed a simple program, Graphical User Interface, simple website application, diagram such as flowchart, ERD, etc.

REMINDERX

October 2024 - Present

APK / [GitHub](#) / [Figma](#)

- Build with React Native, Firebase, Node JS, Express JS, and MongoDB.
- RemindeRX is a mobile application designed to streamline and enhance health management for patients and caregivers.
- Manages medication schedules, monitors inventory, and handles contact information and IoT integration.
- Sends push notifications when the medicine stock reaches 5 and when the expiration date is 7 days away.
- Send a push notification when a reminder is due.
- If the user does not respond to the push notification, takes or skips the medication, a reminder will be sent up to 3 times before an SMS is sent to the contact.

RTU POINT OF SALE

March 2023 - April 2023

[rtu-pos.web.app](#) / [GitHub](#)

- RTU POS is a web application that seamlessly integrates with RTU Apparel.
- With RTU POS, you can add products and manage your inventory in real-time.
- You can easily view messages, users, orders, and receipts from RTU Apparel, all in one place.
- RTU POS makes it easy to track your revenue and order history.
- You can print receipts and manage your stock with ease, all from the RTU POS dashboard.

RTU APPAREL

February 2023 - March 2023

[rtu-apparel.web.app](#) / [GitHub](#)

- Built with React JS and Firebase, RTU Apparel is a modern and efficient e-commerce website for our university merchandise.

- RTU Apparel provides an easy and convenient way for students and alumni to purchase university-branded apparel and accessories online.
